

SATURDAY, AUGUST 27TH AT WHS COLORADO DRONE SOCCER SEASON KICKOFF

WPS and U.S. Drone Soccer cordially invite you to a student-led exhibition of educational drone sports

All current and prospective coaches, students, and parents are welcome to learn about the upcoming 2022-23 Drone Soccer season and career opportunities in aviation.

Drone soccer is a co-ed robotics program for middle and high-school students. Before pilots can compete, they must first learn to build, program, fly, and repair high-performance drones.

Drone Soccer is the only robotics competition that is also an internationally sanctioned team sport by the World Air Sports Federation (FAI). Utilizing open source technology that is affordable, durable, and completely repairable, students are immersed in the FAA culture of safety and visible career paths in engineering, manufacturing, programming, and aviation operations.

Please [RSVP Here](#) for additional information
